

Packaging Your Source Generator

Thomas Claudius Huber

Software Developer

@thomasclaudiush | www.thomasclaudiushuber.com

Module Outline

Create a NuGet package

- Put the assembly into the analyzers directory

Use the NuGet package

Create a NuGet package

Use the NuGet package

Summary

Create a NuGet package

**Put the assembly into
the analyzers directory**

Use the NuGet package

- Add a local package source

Congratulations

Course Summary

Develop a C# source generator

- Find classes with a marker attribute
- Get the public properties
- Generate a ToString method

Work with different compiler APIs

- Syntax API
- Symbol API (Semantic model)

Package the source generator

Thank You
